CW3-1: More Types: Dict – List – Tuple

1. **More Types**

   Create a function that prompts the user to enter a series of values separated by commas. Determine the data types of the entered values and display the count of integers, floats, and strings.

   Expected Test Result:

   ```
   Enter: 42, 3.14, Hello, 7, World

   integers: 2
   floats: 1
   strings: 2
   ```
