7. List Slices

Slice list into 3 equal chunks and reverse each chunk

```python
sample_list = [11, 45, 8, 23, 14, 12, 78, 45, 89]

# Output:
"""
Chunk1: [11, 45, 8]
After reversing it [8, 45, 11]

Chunk2: [23, 14, 12]
After reversing it [12, 14, 23]

Chunk3: [78, 45, 89]
After reversing it [89, 45, 78]
"""
```

Note: For each exercise you need to follow Functional Programming rules.
